

MAMTA RANI

Product Designer, Design-to-Code

mamta.rani.de@gmail.com · +49 178 5624888 · Berlin, Germany · [Portfolio](#) · [LinkedIn](#)

SUMMARY

UX/UI designer focused on creating simple, intuitive digital experiences and shipping them directly to production. Background in fashion design and marketing brings a strong sense of visual design, structure, and user thinking.

Actively design-to-code, directing AI coding tools (Claude Code, Codex, Lovable, ChatGPT, Figma AI) to implement and iterate on my own designs - from prototype to shipped page, including designing, building, and iterating my own portfolio site end-to-end.

KEY COMPETENCIES

- UX/UI Design & Design-to-Production Workflows
- Branding & Visual Identity
- Wireframing & Prototyping
- Frontend Implementation (HTML, CSS, JavaScript)
- Component-Based Design Systems
- Typography & Usability
- Marketing & Communication Design

TOOLS

Figma · FigJam · Claude Code · HTML & CSS · JavaScript · GitHub · Adobe Photoshop · Adobe Illustrator · Adobe InDesign (basic) · Canva

PROJECTS

Personal Portfolio - Design, Build & Ship

- Designed and built end-to-end with Claude Code, HTML, CSS, and JavaScript; iteratively refined and shipped directly to production on GitHub Pages.
- Owned the full design-to-code loop - no handoff, no static files - matching a live, shippable production workflow.

DaddyDo - From Cluttered to Clear (Freelance UX Engagement, Live Product)

- Engaged directly by the founder to audit and simplify a live production app's event card, where child name, date, action, content, and multiple controls competed for attention.
- Mapped every element into three clear roles - action, context, and supporting information - while keeping the product's existing visual identity intact.
- Defined interaction behavior itself, not just static screens: which elements are clickable, how action states respond, and how the card should feel to use.
- Delivered a consistent component system (logo usage, colours, reusable cards, interaction patterns) supporting the resolved direction for implementation into the live product.

ClariBench AI - SaaS Analytics Dashboard

- Simplified complex analytics into a structured dashboard, improving clarity and reducing cognitive load.
- Focused on visual hierarchy, intuitive navigation, and structured UI for data-heavy, non-deterministic interfaces.

Cafe Website - UX/UI Design & Frontend Development

- Designed and developed a responsive cafe website with clean layout, visual hierarchy, and user-friendly navigation.
- Implemented using HTML and CSS for a seamless, live experience across devices.

PupWell - Mobile App Design

- Designed a user-friendly pet care mobile app focused on simplicity and ease of use.
- Created intuitive navigation, clear user flows, and visually balanced screens.

QuietPulse - Mindfulness & Breathing App

- Designed a calm, minimal mobile app interface focused on relaxation and breathing exercises.
- Applied clean layout, typography, and spacing for a soothing, distraction-free experience.

PROFESSIONAL EXPERIENCE

Marketing Manager Intern - Fachhochschule des Mittelstandes (FHM), Berlin

Apr 2024 – Sep 2024

- Designed visual and marketing materials for digital platforms.
- Applied layout, typography, and brand consistency across communication assets.
- Supported user engagement through clear, structured design.

Founder & Brand Manager - Harpnoor Creations, India

Oct 2018 – Oct 2021

- Founded and managed a fashion brand, developing a complete visual identity.
- Designed branding, marketing materials, and product presentation.
- Applied typography, layout, and color systems to maintain brand consistency.
- Worked closely with customers to understand needs and improve overall experience.

EDUCATION

Master of Business Management - FHM University, Berlin

2022 – 2024

Masters in Fashion Designing & Management - Punjab University, India

2015 – 2017

Bachelors in Fashion Designing - Punjab University, India

2012 – 2015

CERTIFICATION

Google UX Design Certificate

6-month program covering UX research, wireframing, prototyping, and user-centered design.
